

Harikrishnan Prasannam

Full Stack Developer

+919080053714 prasannam.harikrishnan@gmail.com https://www.hari-krishnan.com/

Skills

Frontend Development

React, Javascript, Svelte Kit, D3

Backend Development

Python, Flask, Express, NodeJS

Middleware Development

Graphql

Database

MongoDB, Redis, SQLite

Deployment

Kubernetes (K8s) - Helm, Docker

Pipelines

Jenkins, Azure Pipeline

Other Tools

AWS - EC2, AWS - S3, AWS - Lambda,
Azure - VM, Azure Devops, Azure - Vault,
Hashicorp Vault, Keycloak

Certifications

GENAI Practitioner

Accenture
Feb 2024

DevOps Essentials

Accenture
Jan 2022

Awards

Inspiring Innovator Award

Accenture
Dec 2023

Accenture Celebrate Excellence
winner in FY23 Q4, Accenture

The Extra Mile Award

Accenture
Mar 2023

Accenture Celebrate Excellence
winner in FY23 Q1, Accenture

Profiles

- in [Linkedin Profile](#)
-  [Github Profile](#)

Summary

- Dedicated and self-motivated Developer with over **4 years** of experience in **Full stack development**. Proficient in developing robust enterprise web applications using **Microservices** architecture. Equipped with strong communication and collaboration skills, seeking a pivotal developer role in a dynamic organization

Experience

Accenture India Pvt Ltd

Application Development Senior Analyst,
Coimbatore

June 2024 - Present

- Developed advanced features in a **Knowledge Graph**, including node filtering, **dependency creation**, **visual path tracing** between related nodes, and identification of missing dependencies, **enhancing data visualization** and analysis.
- Built a **documentation generation** feature leveraging application source code and a static workflow engine, enabling automated documentation through **configurable prompt and non-prompt** based steps.
- Conducted a Proof of Concept (**POC**) to **fine-tune** a Large Language Model (**LLM**) with domain-specific datasets, demonstrating a **30% improvement** in response accuracy and **contextual relevance**.
- Collaborated directly with clients** to implement custom add-on features and modify existing functionality to **meet specific business requirements** and use cases

Accenture India Pvt Ltd

Application Development Analyst
Coimbatore

June 2022 - June 2024

- Implemented **Micro Frontend (MFE)** architecture using React, modularizing a **monolithic** application **into independently deployable units**, enabling parallel development across teams
- Led end-to-end transition** from a monolithic architecture to Micro Frontend (MFE) using React, deploying modular applications on **AWS and Azure** with Docker, **Kubernetes(Helm)**; **owned** the entire **DevOps lifecycle** including boilerplate setup, Dockerfile creation, CI/CD pipeline scripting, and Helm chart development
- Designed and architected** a distributed **worker system** to process **time-intensive tasks** concurrently using Redis, WebSockets, and Kubernetes Jobs, significantly **improving throughput** and system responsiveness
- Built** and visualized a **Knowledge Graph** using **D3.js** to represent complex relationships within **Generative AI (GenAI)** datasets, facilitating **deeper insights** and data connectivity
- Collaborated** with the platform administration team to **onboard** Micro Frontend (MFE) child applications into the **centralized UI framework**, ensuring **seamless integration** and alignment with **organizational standards**.

Accenture India Pvt Ltd

Application Development Associate
Chennai

May 2021 - May 2022

- Collaborated with cross-functional team to develop **basic features** and **resolve critical bugs**
- Designed and implemented a Python-based middleware **microservice** to **manage dynamic application configurations**, integrating securely with Vault providers for secrets management
- Developed and enforced **Role-Based Access Control (RBAC)** for a multi-tenant architecture using **Keycloak** as the identity and access management (**IAM**) solution
- Boosted API** performance by **10x** through advanced **MongoDB aggregation** techniques, reducing response times and improving scalability
- Engineered a **dynamic ETL solution** using JMESPath and regex-based pattern matching, enabling **on-the-fly data extraction** and transformation **tailored to diverse input** schemas

Education

M.Kumarasamy College of Engineering

Electronics & Communications Engineering
7.6
